Lab Policies

I. General Policies

Attendance Policy	• Attendance of the lab is Mandatory (except for lab 1). Not attending the lab will result into a **mark of zero** for both the attendance and report grade
Lab organization	• The lab will be conducted at Mohawk Campus i-216 • Each lab can have up to 20 students ○ Groups of 2 students will be formed ○ Performance of the groups will be monitored and supported by the instructor
Lab Submission	• **Only one Lab Report** should be submitted **per group** (except for lab 1)
Assessments	• The Lab weight is **12.5% of the course grade** • **50% of the lab mark** is on attendance and performance during the lab ○ 20% attendance (please see the **attendance policy** above) ○ 40% completing the whole lab, including the "extend your knowledge" section, on a timely fashion ○ 40% Successful troubleshooting of lab issues ○ Attending the lab **20 min late** will result into a mark of **zero** for both the attendance and the report/video submission. • **50% of the lab mark** is on the lab reports. ○ Students will have one week after a lab experiment to submit their lab reports. The lab reports must be submitted within the first 15 minutes of the start of the subsequent lab session. The lab report may be submitted late at a penalty of 10% per day up to a maximum of 70% off, or seven days late. If a report is submitted after the seven-day late period, the report will receive a mark of zero. ○ Lab Report marking scheme is described in the next section

II. Lab Report Writing

The report should be submitted in pdf format. The following sections must be included.

1. Title Page (1 Mark)

You should use the title page on Page 3 of this document.

2. Abstract (2 Marks)

Things that can be included in the abstract are: Why the experiment was done? How was the experiment done? What were the main results? What is the conclusion of the experiment?

Write this section last, but place it first

3. Results and discussions (6.5 marks)

- Include tabulated experiment results
- Show sample calculations
- Answer all questions that are in the lab manual. You must include the step number of the experiment that corresponds to the question the questions.
- Plots must be labelled, numbered, and has a title. Label axes with quantities and units

Refer to the plots in the text of your report

4. Conclusion (0.5 marks)

- Discuss the theories involved, the results you are supposed to obtain and compared to those found.
- Note any problems in procedure that may affect your experiment.
- Write your conclusions drawn from your results.

5. Recommendation (if any)

Include precautions regarding procedure, treatment, applications of the tested material in certain conditions etc. How could the experiment be improved?

6. References (if any)

List all books and websites used in researching the experiments
